

JBC C470-SP01

Solder Pot Cartridge 18 x 15

This model is ideal for tinning wires and components faster and safer.

This cartridge can be used also to desolder Through Hole Multipin components.

The long-lasting coating pot will resist the corrosiveness of lead free solder alloys.

It works with T470 handles, which can be connected to HDE station through HD-SD stand or CHB-A converter.

It should be employed with the CT-SA Solder Pot Cartridge Stand, which avoids tipping over accidentally and allows you to work safely.
