

Pedal Kit for Control Units

This foot switch makes the tool enter Sleep or Hibernation modes, causing no thermal stress when the component is placed on the PCB. Ideal for working with tweezers.

By using the Connection Box, the P005 Pedal works with only the tool port to which it is connected.

Compatible with DIU, DD, DDU, HDU, DM, DMU and HD/HDU Control Units. Its also available with WSS and WSB Wire Stripper Stations

REFERENCE
