

Conical Cartridge Ø 1

C245E Cartridges have been designed with a thicker iron layer what makes this tip ideal for tough and repetitive works in mass production. A thicker iron layer reduces the thermal efficiency.

They are appropriate for **general soldering** purposes and they are perfect for both **SMD components** or for applications with high power requirements such as ground plane soldering.

They work with T245 Handle .

They last 5 times longer than other brands thanks to the JBC Most Efficient Soldering System and the Sleep & Hibernation features.
